

PROJECTS, PLANNING, REQUIREMENTS ENGINEERING,
AND HANDLING MULTIPLE TASKS AT THE SAME TIME
ARE NO STRANGERS TO YOU?

Then plan a career at Aximpro® as a Technical Project Manager (f/m)

Aximpro® is a software development and consultancy company with profound expertise in Channel Marketing and the IT sector. More than just a software company and more than just a consulting firm, Aximpro® also supports its customers worldwide with Channel Marketing Intelligence and (Co)- Marketing strategies and execution. Aximpro® makes campaigns and communication a breeze to manage—even across borders. Our main goal is to identify and exploit growth potentials for vendors and their channel partner landscape in order to generate additional sales and business opportunities and to identify the market dynamics that drive sales.

For our location in Freising, as soon as possible, we are looking for a

Technical Project Manager (f/m)

JOB DESCRIPTION

As a technical project manager with a focus on IT, you are capable of understanding the technical and professional requirements in order to evaluate and specify them. You need to have a view for the "whole". You work closely with account management and technical team to align requirements and time schedules. As a technical project manager, you're the link between customer demands and the technical department, realizing these requirements by pointing out what is possible, what risks might be included, or what other approaches might be possible. You ensure that all development services are provided on time with the quality standards agreed upon.

TASKS:

- Create and align technical specification with internal and external stakeholders
- Be a technical expert and consultant for internal and external stakeholders
- Provide support in pre-sales phase
- Coordinate software development resources and tasks
- Provide technical project planning and execution
- Provide second-level support for internal stakeholders
- Execute second-level testing, quality assurance, and product updates
- Create ad hoc reports on demand in response to business-relevant factors
- Demonstrate a deep understanding of products and their implementation
- Conduct feasibility analysis on requirements
- Configure portals requiring a deep technical understanding
- Possess the programming skills needed to understand the logic and structure of existing solutions and products
- Moderate meetings and workshops

REQUIREMENTS:

- Programming skills in an object-oriented programming language (ideally in C#)
- Knowledge and experience with databases (ideally Microsoft SQL)
- Web programming skills (HTML, CSS, JavaScript)
- Analytical and logical thinking skills
- Structured way of working
- Communication skills
- Experience with agile project management
- Fast comprehension of complex matters
- Self-motivated and an independent worker
- Strong team player, problem solver, and creative thinker
- Fluent in business English
- Minimum of a bachelor's degree in IT, economics IT, or similar
- Goal and solutions oriented

WHY AXIMPRO®

We offer an attractive working environment in a future-focused industry. The role and projects are varied and allow you to work independently within a small, young, and dynamic company with flat hierarchies and short decision-making paths. With us, you can fully contribute and develop your individual strengths further and grow by facing new challenges.

HAVE WE PIQUED YOUR INTEREST?

If so, please apply by sending a current curriculum vitae in PDF format with your salary expectation to Monika Lehmann at mlehmann@aximpro.com.

We look forward to hearing from you!
